## UPRIGAZ POLICY STATEMENT ON CARBON NEUTRALITY AND CLIMATE ACTION

UPRIGAZ fully adheres to the climate goals of the Paris Agreement and to the energy and climate targets of the European Union Commission, aiming at reaching carbon neutrality in 2050. UPRIGAZ supports the EU FF55 policy ambitions and with its members, contributes to a policy framework that is the most effective and consumer friendly decarbonisation track for the EU Economy.

With the support of its members, UPRIGAZ has established a policy framework with a view to contributing to the most effective and consumer friendly decarbonization track of the EU economy.

Such positions of UPRIGAZ are voiced through various channels, in particular in response to the numerous public consultations of the French and EU authorities, where they are posted as free for publication. They can also be viewed on the association's website.

UPRIGAZ is advocating for the optimal synergy between the development of renewable electricity and gas resources and the use of existing infrastructures, in particular to foster the potential of biomethane and low carbon hydrogen.

UPRIGAZ is against all forms of corruption and is subject to the control of the High Authority for the Transparency of Public Action (HATVP), which ensures in France that an ethical framework and a set of rules are respected by professional associations. UPRIGAZ reports all required lobbying actions each year to the High Authority that have been conducted.
